

ARCHIVIST EDITION / 21 JULY 2026

A Letter of Appreciation for Lily Chen

Dear Lily,

Thank you for receiving *Lilium Aeternum*, a private celestial dedication created in your honour. This archive brings together an original astronomical artwork, a model-derived planetary system, a live orbital visualisation and a continuing record of future refinements.

The name does not replace an official scientific designation, nor does it claim ownership of a celestial object. Its purpose is more personal: to preserve a promise, a birthday, and the meaning of being remembered across distance and time. The scientific language in your portfolio is deliberately transparent about what is modelled, what is inferred and what remains unknown.

Your Archivist Edition includes the private registry **NOR-LILY2026**, the model system **NOCTUA-LILIUM-0721**, a printable dedication certificate, the accompanying research dossier, an artist's impression and access to the interactive orbital archive.

We hope this gift becomes a quiet place you can return to - a reminder that wonder can be both carefully studied and deeply felt.

With appreciation,

NOCTUA Celestial Research Lab

PRIVATE ARCHIVE NOTICE

This letter accompanies a symbolic private registry and model research archive. It is not evidence of an official astronomical discovery, naming decision or property right.
